

Our long-term packaging allows storage for up to 5 years. During this storage period, you can install the bearing into your application without previous inspection.

Our service package “Long-term packaging” contains:

- Conservation of bearing
- Packaging of bearing (airless and sealed packaging including desiccant)
- Humidity indicator
- If humidity is too high, bearing inspection needs to be performed

## The added value for you:

- ➞ Protected investment
- ➞ Higher availability of production assets due to instant bearing replacement
